MID ANDROID DEVELOPER

We are LightPixel, a company with over 15 million downloads of our apps and games. We are a remote company with base in Warsaw and since we are expanding, we are looking for the great android developer to join the team.
We are looking for the skilled **mid Android Developer** who is ready to create top level native android apps and take an active role in the creative process.

What will you do:
- Design, implement new features in the existing android apps
- Design, implement, optimize our new android apps
- Impact the process of creating our apps
- 80% work on new features and new apps, 20% maintenance

Our expectations:
- 2+ years of professional programming in Android (java, kotlin)
- Ability to write high quality and easy to maintain code
- Understanding of code versioning tools, such as Git
- Open to learning new things and happy to share your knowledge
- Happy to work remotely
- Once a month meeting in our office in Warsaw to do the creative job
- You know more about code review and pair programming than what you just read on the Wikipedia page
- Nice to have: experience in photo and video processing

What do we offer:
- Work on great apps and more awesome ideas to come
- Unique work atmosphere where we appreciate a good brainstorm and never schedule needles meetings
- Remote work
- Office in the Google Campus in Warsaw where you can work surrounded with the best (if you prefer work from the office)
- We are also all-time fans of food and hooch in "Pyzy Flaki Gorące" where we will surely take you :)

Our approach
Having fun, exploring ideas, creating, solving, building great things for our users, being proud of your work, challenging yourself, learning, growing, building a self-sustaining company, adding something useful to the world, and working with great people — that's what our company is all about.

Sounds good? Please apply via email **jobs@lightpixel.io** and remember to include your CV and few words about You.
